Requirement

The Nuqi Wealth India platform will incorporate a Mutual Fund Investment Module enabling users to discover, invest, and monitor mutual fund schemes available on the NSE Mutual Fund Platform (NMF II).

The platform will provide a fully digital investment experience allowing investors to complete regulatory compliance, browse schemes, perform investments, and track their portfolio performance through the Nuqi Wealth mobile and web applications.

The platform will initially support Lumpsum Investments, SIP Registrations, Portfolio Monitoring, and Transaction History, with future capability to support Redemption, STP, SWP, and SIP modifications.

Supported Transactions (Phase 1):

- Lumpsum Purchase
- SIP Registration
- Portfolio View
- Transaction History

Future scope:

- Redemption
- STP
- SWP
- SIP modification

Features

- Mutual Fund Marketplace: Users can explore mutual fund schemes categorized by Equity, Debt, and Hybrid funds.
- Lumpsum Investment: Allows users to invest a one-time amount into a selected scheme.
- SIP Investment: Enables systematic monthly investments through bank mandate authorization.

- **Portfolio Dashboard:** Provides investors with a consolidated view of all their investments and returns.
- **Transaction Tracking:** Allows investors to view past transactions including purchases and SIP registrations.
- **Regulatory Compliance Engine:** Ensures verification of KYC, PAN, FATCA declarations, and risk profiling before enabling transactions.
- **Exchange Integration:** Transactions are routed to the NSE NMF II platform for processing with respective AMCs.
- **Automated Mandate Registration:** Enables digital bank mandate setup for SIP debit instructions.

Objective

- Provide a secure and seamless digital platform for mutual fund investments.
- Ensure complete regulatory compliance with SEBI, AMFI, and exchange guidelines.
- Enable real-time tracking of investments and portfolio performance.
- Simplify the investment journey through automated compliance verification and digital transaction processing.

Functional Requirements

User Login & Onboarding Journey (Mutual Funds Feature)

Step 1: UCC Details (Client Desk)

The feature initiates by displaying pre-fetched or registered client data.

- Distributor Name: Alpha Wealth Advisors Pvt Ltd
- Client Name: John Doe
- PAN: ABCDE1234F
- DOB: 01-01-1990
- Gender: Male

Step 2: First Holder Personal Details

The user completes their financial and professional profile.

- Select Gender: Male

- Marital Status: Married
 - Account Type: Individual
 - Email ID: johnndoe.dummy@gmail.com
 - Occupation Type: Private Sector Service
 - Annual Income: 5 - 10 Lacs
 - Wealth Source: Salary
-

Step 3: Address & Residency Details

Users provide residential information.

- Address Type: Residential
 - Address: Flat No. 201, Sunrise Apartments, Andheri East
 - Pin Code: 400069
 - City of Birth: Mumbai
 - Country of Birth: India
 - Current State: Maharashtra
-

Step 4: Compliance Logic (Declarations)

User confirms regulatory declarations.

Declarations:

- ☒ Not a politically exposed person
- ☒ I am not a taxpayer of any country other than India

Action: Click Continue

Step 5: Bank Account Validation

User links their bank account for investment transactions.

- IFSC Code: ABCD0001234
- MICR Code: 400123456

- Bank Name: ABC Bank Ltd
- Account Number: 123456789012
- Account Type: Saving

Bank Verification (Penny Drop)

To validate the bank account, the system performs a Penny Drop verification.

Process:

1. User clicks Verify Bank Account.
2. The system initiates a ₹1 debit transaction from the user's bank account.
3. The system validates the account holder's name with the registered client name.
4. Once verified, the screen shows:

Status:

✓ Bank Account Verified Successfully.

Step 6: Nominee Details (Optional)

User assigns a nominee for the mutual fund folio.

- Nominee Name: Jane Doe
 - Relationship: Spouse
 - Date of Birth: 10-10-1992
 - Share Percentage: 100%
 - Nominee ID Proof: PAN Card
 - Max Nominee can be added 3.
-

Step 7: Authorization Confirmation

Final confirmation before submission.

Screen displays:

- UCC Details

- PAN Number
- Authorization Mode

Action: Click Authorize

Verification Process:

System sends OTP to registered Mobile Number and Email.

Dummy OTP Entry:

772211

Status Message:

"Thank you for completing authorization."

Step 8: Mandate Setup (Auto Debit for Investments)

After successful authorization, the user proceeds to Mandate Setup to enable automatic debit for SIP investments.

Select Mandate Mode

User selects the preferred mandate option.

Options Available:

- E-Mandate – Setup mandate instantly using debit card or net banking
- Physical Mandate – Download and upload signed mandate form

Selected Option: E-Mandate

User clicks Next.

Step 9: About You (Mandate Details)

The system displays the user's basic information for confirmation.

- Name: John Doe
- Mobile Number: 9876543210

- Telephone Number: 0223456789
- Email ID: john.doe.dummy@gmail.com

User proceeds to mandate details.

Step 10: Mandate Details

User sets the mandate limit and validity.

Account Information

- Account Type: Savings Account
- Bank: ABC Bank Ltd
- Account Number: XXXXXXXXX9012
- Confirm Account Number: 123456789012

Mandate Amount

User selects the maximum debit limit.

- Amount Selected: ₹500
- Available quick options: ₹500 / ₹1000 / ₹5000

Mandate Type

- Fixed Amount
- Maximum Amount (Selected)

Mandate Validity

- Start Date: 01-Apr-2026
- End Date: 31-Mar-2056

Additional Details

- Frequency: As & When Presented
- Purpose: Mutual Fund Investments
- Authentication Mode: Debit Card

User checks the authorization declaration:

☒ I/We authorize the platform to create recurring debit instructions from my bank account.

User clicks Next.

Step 11: Mandate Authentication

User verifies the mandate via Debit Card authentication.

User enters:

- Debit Card Number
- Expiry Date
- CVV
- OTP received on registered mobile number

After successful verification:

Status:

✓ E-Mandate Successfully Registered.

Final Status

The system displays confirmation:

"Mandate setup completed successfully. You can now start investing in Mutual Funds through SIP or Lump Sum."

E-Mandate Debit Enrollment (Bank of Baroda – BillDesk) process.

Step 1: Open E-Mandate Enrollment Page

The user is redirected to the Bank of Baroda – BillDesk E-Mandate Debit Enrollment Details page to authorize automatic debit for investment payments.

The screen displays the mandate of details that will be used for recurring or authorized debit transactions.

Step 2: Review Mandate Details

The following fields are displayed on the screen. Users should review them before proceeding.

Field	Example (Dummy Entry)
Account Number	123456789012
Mandate Issued To	ABC Fintech Private Limited
Start Date	01/04/2026
End Date	31/03/2036
Frequency	ADHO (Ad-hoc / As and when required)
Amount in Figures	1,000.00
Amount in Words	One Thousand Rupees Only
Purpose of Mandate	Mutual Fund Investment

Users must ensure that all details are correct and match their bank account information.

Step 3: Authorize the Mandate

Below the mandate details, the user will see an authorization checkbox.

Example authorization text:

I hereby authorize Bank of Baroda to create recurring debit instruction on my card/account and allow the bank to debit Rs. 118 (including GST) as a one-time E-Mandate registration charge as per bank norms.

Action:

- Tick the authorization checkbox to provide consent.
-

Step 4: Proceed with Mandate Registration

After verifying all details and selecting the authorization checkbox:

1. Click the “Proceed” button.
2. The system will initiate the E-Mandate registration process.
3. The user may be redirected to the bank authentication page (OTP / Net Banking verification).

Step 5: Authentication and Confirmation

1. Complete bank authentication (for example, OTP verification).
 2. Once verified, the E-Mandate will be successfully registered.
 3. A confirmation message will appear indicating that the mandate setup is complete.
-

Result:

The user successfully authorizes automatic debit from their bank account for the specified investment or payment.

Step: Review E-Mandate Details

After initiating the E-Mandate registration, the user is shown a summary screen displaying the mandate details and corporate information. The user must review the details before proceeding.

Mandate Details

Field	Example Entry
Start Date	01-Apr-2026
End Date	31-Mar-2036
Frequency	As & When presented
Purpose of Mandate	Mutual Fund Investments
Authentication Mode	Debit Card
Bank	XYZ Bank

Note:

Users may cancel their mandate at any point in time through their bank or mandate management options.

Important Note Displayed on Screen

The system displays an informational message to guide the user:

Note: You are in the process of an E-Mandate registration. Check all the details provided and click on and proceed to continue the registration process. In case of any discrepancy, you may cancel or go back to edit the required fields.

Available Actions

At the bottom of the screen, the user is provided with the following options:

Button	Action
Back	Returns to the previous screen to review or edit mandate details.
Cancel	Cancel the E-Mandate registration process.
Proceed	Continue with the mandate registration and moves to the bank authentication step (such as OTP or card verification).

Outcome:

Once the user clicks Proceed, the system redirects the user to the bank authentication process to complete the E-Mandate registration.

1. Cancel Mandate

Description

The Cancel Mandate feature allows the user to terminate an existing NACH (ECS) auto-debit mandate linked to their bank account. Cancelling the mandate will stop all future auto-debit transactions associated with the selected mandate.

User Flow

Step 1: View Mandate Details

- The system displays the **existing NACH mandate** linked to the user's bank account.
- Mandate details shown include:
 - Bank Name
 - Mandate Reference Number
 - Mandate Limit Amount

Example (Dummy Data)

Bank: HDFC Bank

Mandate Ref No: HDFC000123456

Mandate Amount: ₹5,000

Step 2: System Check for Linked SIPs

- When the user initiates mandate cancellation, the system checks if any active SIPs are linked with the selected mandate.

If SIPs are linked:

- A popup appears to show **SIPs associated with the mandate**.

Displayed Information:

- Asset Type
- Scheme Name
- SIP Start Date
- SIP End Date
- Effective Stop Date

Example:

Asset Type	Scheme Name	Start Date	End Date	Effective Stop Date
Mutual Fund	DSP Liquidity Fund – Daily Dividend	07-May-2026	07-Mar-2031	07-Apr-2026

Step 3: Select SIP Cancellation Reason

User must select a **reason for SIP cancellation** from the dropdown.

Available Options:

- Non availability of Funds
- Scheme not performing
- Service issue
- Load Revised
- I wish to invest in other schemes
- Change in Fund Manager

- Goal Achieved
 - Not comfortable with market volatility
-

Step 4: Confirmation

- User clicks **OK** to confirm cancellation.
 - System processes:
 - SIP cancellation
 - Mandate cancellation request
-

System Behaviour

- Mandate status changes to **Cancellation Requested**.
 - Auto-debit transactions stop after the **effective stop date**.
 - User receives confirmation via **email/SMS notification**.
-

2. Cancel SIP

Description

The **Cancel SIP** functionality allows users to stop an active **Systematic Investment Plan (SIP)** linked to their bank mandate.

User Flow

Step 1: Display SIP Details

The system shows the SIP linked with the mandate.

Displayed Fields:

Field	Description
Asset Type	Type of investment (Mutual Fund)
Scheme Name	Name of the SIP scheme

Field	Description
SIP Start Date	SIP initiation date
SIP End Date	SIP maturity/end date
Effective Stop Date	Date after which SIP stops

Example:

Asset Type	Scheme Name	Start Date	End Date	Effective Stop Date
Mutual Fund	DSP Liquidity Fund – Daily Dividend	07-May-2026	07-Mar-2031	07-Apr-2026

Step 2: Select SIP

- User selects the SIP using the **checkbox** provided.

Step 3: Select Cancellation Reason

User must choose a **cancellation reason** from the dropdown list.

Options include:

- Non availability of Funds
- Scheme not performing
- Service issue
- Load Revised
- I wish to invest in other schemes
- Change in Fund Manager
- Goal Achieved
- Not comfortable with market volatility

Step 4: Confirm Cancellation

User clicks **OK** to submit the cancellation request.

System Processing

- SIP status updated to **Cancellation Requested**.
 - SIP stops from the **effective stop date**.
 - User receives **confirmation notification via Email/SMS**.
-

3. Switch Mandate

Description

The **Switch Mandate** feature enables users to change the **existing bank mandate associated with an active SIP** to another registered mandate.

This is typically used when:

- User wants to change the bank account
 - User has created a new mandate with higher limit
 - User wants to switch debit source
-

User Flow

Step 1: Select Existing Mandate

Field: **From NACH (New ECS) Mandate**

Example:

Bank name | Ref No: 00000000 | Amount ₹500

Step 2: Select New Mandate

Field: **To NACH (New ECS) Mandate**

User selects the **new mandate** from available mandates.

Example:

ICICI Bank | Ref No: ICICI00045789 | Amount ₹10,000

Step 3: Select Schemes

System displays schemes linked with the selected mandate.

Displayed Fields:

Select	Asset Type	Scheme Name	Next Date
☒	Mutual Fund	DSP Liquidity Fund – Daily Dividend (₹500)	07-May-2026

User can use:

- **Select All**
 - **Select None**
 - Individual **checkbox selection**
-

Step 4: Submit Request

User click **SAVE**.

System Processing

After submission:

- SIP mandate mapping changes from **old mandate** → **new mandate**
 - Future auto-debits will be processed through the **new mandate**
 - User receives confirmation via **email/SMS**
-

Validation Rules

- "To Mandate" must be **different from the existing mandate**.
 - The mandate amount must be **greater than or equal to SIP amount**.
 - Only **active mandates** can be selected.
 - SIP must be in **Active status**.
-

Mutual Fund Redemption – User Steps

1. Open Redemption Window

- User navigates to the **Mutual Fund Holdings / Portfolio** section.
 - Users select the scheme they wish to redeem.
 - The “**Redeeming Your Mutual Fund**” window opens.
-

2. Select Investor

- In the **Investor** dropdown, select the investor name.
 - Example: Xyz
-

3. Select Scheme

- Under **Scheme Details**, choose the mutual fund scheme from the dropdown.
 - Example: ICICI Prudential Liquid Plan – Regular Plan – Growth.
-

4. Choose Redemption Type

Under **Redemption Details**, select one of the following options:

- **Units** – Redeem by entering the number of units.
 - **Amount** – Redeem by specifying the redemption amount.
 - **Sell All** – Redeem the entire holding.
-

5. Enter Redemption Units / Amount

- If **Units** is selected, enter the number of units to redeem.
 - The system displays **Available Units** for reference.
 - Minimum redemption units may apply as per scheme rules.
-

6. Exit Load Information

- The **Exit Load** applicable for the scheme is displayed.

- Example: Exit Load – Nil.
-

7. Select Redemption Reason

- From the **Redemption Reason** dropdown, select the appropriate reason.
 - Example: I want to make profit.
-

8. Accept Scheme Documents

Users must tick the confirmation checkbox confirming that they have read and understood:

- **Scheme Information Document**
 - **Key Information Memorandum**
 - **Scheme Information Documents**
 - **Statement of Additional Information**
 - **Declaration, Terms & Conditions**
-

9. Submit Redemption Request

- Click the **REDEEM** to submit the redemption request.
 - Alternatively, click **CANCEL** to exit without submitting.
-

10. Redemption Confirmation

- Upon successful submission, a confirmation popup appears displaying:

“Redemption Placed Successfully.”

- Click **OK** to close the confirmation message.
-

1. Regulatory Compliance Requirements

Before allowing investments, the platform must ensure:

Mandatory Investor Compliance

Compliance	Description
KYC	Investor identity verification
PAN	Mandatory for MF investments
PAN-Aadhaar linking	Required for capital market transactions
FATCA/CRS declaration	Tax residency disclosure
Bank verification	Required for payment and redemption
Nomination	Mandatory or explicit opt-out
Risk profiling	Suitability assessment

KYC verifies the identity of the client and beneficial owner as part of anti-money laundering compliance under the Prevention of Money Laundering Act.

2. Product Modules

User Onboarding

Objectives

Ensure regulatory onboarding and investment readiness.

Functional Flow

1. Mobile OTP verification
2. PAN verification
3. CKYC/KRA check
4. Aadhaar based eKYC or Video KYC
5. FATCA declaration
6. Bank account addition
7. Risk profile questionnaire
8. Nomination capture
9. Consent and disclosures

Mutual Fund Marketplace

Features

- Scheme details
- Fund details page

Fund Information Display

Field	Description
Fund Name	Scheme name
AMC	Asset management company
NAV	Net asset value
Category	Equity / Debt / Hybrid
Riskometer	Risk rating
Expense ratio	Fund cost
AUM	Assets under management
Returns	1Y / 3Y / 5Y

Lumpsum Investment Module

User Flow

1. Select scheme
 2. Enter investment amount
 3. Select bank/payment method
 4. Confirm order
 5. Payment authorization
 6. Order submission to NSE
 7. Transaction confirmation
-

SIP Investment Module

SIP Features

- Monthly SIP
- SIP date selection
- Mandate registration
- SIP cancellation
- SIP modification (future release)

SIP Flow

1. Select scheme
 2. Choose SIP
 3. Enter SIP amount
 4. Select SIP date
 5. Select tenure
 6. Mandate registration
 7. Confirm SIP
-

Portfolio Module

Features

- Portfolio summary
 - Investment value
 - Current value
 - Absolute returns
 - XIRR/CAGR
 - Scheme-wise view
 - Asset allocation
-

Transaction History

Includes:

- Purchase
 - SIP registration
 - SIP installment
 - Redemption
 - Switch
-

3. System Architecture

Typical architecture for NSE MF integration:

Mobile App / Web Portal

Application Backend

Mutual Fund Order Engine

NSE NMF II API

AMC

RTA (CAMS / KFinTech)

Unit Allotment

Portfolio Update

The NSE NMF II platform allows distributors with valid AMFI registration to transact in mutual funds through exchange infrastructure.

4. Full List of Data Fields for Mutual Fund Transactions

Below is the **complete field list** used by most NSE/BSE MF integrations.

Investor Master Fields

Field	Description
Investor ID	Unique platform ID
Client Code	Exchange client code
PAN	Permanent Account Number
First Name	Investor name
Middle Name	Optional
Last Name	Investor name
Date of Birth	Required
Gender	Male/Female/Other
Mobile Number	OTP verification
Email ID	Communication
Occupation	Compliance
Annual Income	Risk profiling
Politically Exposed Person	Yes/No
Tax Residency	FATCA
Country of Birth	FATCA

Address Fields

Field	Description
Address Line 1	Address
Address Line 2	Optional
City	City
State	State
Country	Country
PIN Code	Postal code

KYC Fields

Field	Description
KYC Status	Verified/Pending
KYC Type	CKYC / eKYC
KYC Number	CKYC number
KRA Name	CAMS / CVL
PAN-Aadhaar Linked	Yes/No

Bank Details Fields

Field	Description
Bank Account Number	Investor bank
IFSC Code	Bank identifier
Bank Name	Bank

Field	Description
Account Type	Savings/Current
Branch Name	Branch
MICR Code	Optional

Nominee Details

Field	Description
Nominee Name	Nominee
Nominee DOB	Date
Relationship	Relation
Nominee Percentage	Allocation
Guardian Name	If minor nominee

Scheme Details Fields

Field	Description
Scheme Code	NSE code
Scheme Name	Fund name
AMC Code	Asset management company
Plan Type	Direct / Regular
Option Type	Growth / IDCW
ISIN	Scheme identifier

Lumpsum Transaction Fields

Field	Description
Transaction ID	Platform transaction
Order ID	Exchange order ID
Transaction Type	Purchase
Investment Amount	Amount
Units	Allotted units
NAV	Applicable NAV
Transaction Date	Order date
Settlement Date	Unit allotment date
Payment Mode	UPI / Netbanking

SIP Registration Fields

Field	Description
SIP Registration ID	Unique SIP
SIP Amount	Installment amount
SIP Frequency	Monthly
SIP Start Date	First SIP
SIP Date	Debit date
SIP End Date	Optional
Installment Count	Number of installments
Mandate ID	UMRN

NSE uses a **Unique Mandate Reference Number (UMRN)** to map bank mandates with SIP registrations.

Mandate Fields (NACH / eMandate)

Field	Description
Mandate ID	UMRN
Mandate Limit	Maximum debit
Mandate Start Date	Mandate validity
Mandate End Date	Expiry
Bank Account	Linked bank
Authentication Mode	Netbanking / Aadhaar

Order Status Fields

Field	Description
Order Status	Pending / Success / Failed
Exchange Status	Accepted / Rejected
RTA Status	Allotted
Units Allotted	Units
NAV Applied	NAV
Transaction Timestamp	Time

5. Error Handling

Common rejection reasons:

- KYC not verified
- Bank mandate rejected
- Insufficient balance
- PAN-Aadhaar not linked

- Scheme closed
-

6. Notifications

Below is a complete trigger-point communication plan (Email / SMS / App Push)

6.1 User Onboarding & Compliance Notifications

These are triggered during the onboarding journey described in the BRS (personal details, compliance declaration, bank verification, mandate setup).

Trigger Event	Email	SMS	App Notification
User starts Mutual Fund onboarding	✓	—	✓
OTP sent for authorization	—	✓	—
OTP verified successfully	✓	—	✓
KYC verification successful	✓	—	✓
KYC verification failed / pending	✓	✓	✓
FATCA declaration submitted	✓	—	✓
Risk profiling completed	✓	—	✓
Nominee added successfully	✓	—	✓
Nominee updated	✓	—	✓
Nominee deleted	✓	—	✓

6.2. Bank Account Verification Notifications

Based on the **penny drop verification flow** described in the BRS.

Trigger Event	Email	SMS	App
Bank account verification initiated	—	✓	✓
Bank account verified successfully	✓	✓	✓

Bank verification failed	✓	✓	✓
Bank account updated	✓	—	✓
Bank account removed	✓	—	✓

6.3. Mandate Setup Notifications

Triggered during **E-Mandate / NACH registration flow**.

Trigger Event	Email	SMS	App
Mandate registration initiated	—	✓	✓
Mandate authentication required	—	✓	✓
Mandate registration successful	✓	✓	✓
Mandate registration failed	✓	✓	✓
Mandate limit updated	✓	—	✓
Mandate nearing expiry	✓	✓	✓
Mandate expired	✓	✓	✓

6.4. Lumpsum Investment Notifications

Triggered during the **Lumpsum investment flow (scheme selection → payment → NSE submission)**.

Trigger Event	Email	SMS	App
Investment order initiated	—	—	✓
Order submitted to exchange	✓	—	✓
Payment successful	✓	✓	✓
Payment failed	✓	✓	✓

Order accepted by exchange	✓	—	✓
Order rejected by exchange	✓	✓	✓
Units allotted	✓	✓	✓
Units allocation delayed	✓	—	✓

6.5. SIP Registration Notifications

Triggered when user creates SIP as per SIP flow.

Trigger Event	Email	SMS	App
SIP registration initiated	—	—	✓
SIP registration successful	✓	✓	✓
SIP registration failed	✓	✓	✓
SIP linked with mandate	✓	—	✓
SIP activation confirmed	✓	✓	✓

6.6. SIP Installment Notifications

These occur during ongoing SIP lifecycle.

Trigger Event	Email	SMS	App
Upcoming SIP reminder (T-3 days)	✓	✓	✓
SIP installment debit initiated	—	✓	✓
SIP installment successful	✓	✓	✓
SIP installment failed	✓	✓	✓
SIP installment retry	✓	✓	✓

6.7. SIP Cancellation Notifications

Triggered during **SIP cancellation flow** in the BRS.

Trigger Event	Email	SMS	App
SIP cancellation initiated	✓	—	✓
SIP cancellation request submitted	✓	✓	✓
SIP cancelled successfully	✓	✓	✓

6.8. Mandate Cancellation Notifications

Triggered when user cancels NACH mandate.

Trigger Event	Email	SMS	App
Mandate cancellation initiated	✓	—	✓
Mandate cancellation requested	✓	✓	✓
Mandate cancellation successful	✓	✓	✓
Linked SIP impacted due to mandate cancellation	✓	✓	✓

6.9. Mandate Switch Notifications

Triggered when user switches mandate for SIP.

Trigger Event	Email	SMS	App
Mandate switch request initiated	✓	—	✓
Mandate switch request submitted	✓	✓	✓
Mandate switch successful	✓	✓	✓
Mandate switch failed	✓	✓	✓

6.10. Portfolio Notifications

Triggered based on portfolio monitoring feature in BRS.

Trigger Event	Email	SMS	App
New investment added to portfolio	✓	–	✓
Portfolio value milestone	✓	–	✓
Monthly portfolio summary	✓	–	✓
Annual investment summary	✓	–	✓

6.11. Transaction Failure Notifications

Triggered for error scenarios mentioned in BRS.

Trigger Event

KYC not verified

Bank mandate rejected

Insufficient balance

PAN-Aadhaar not linked

Scheme closed

Exchange order rejection

RTA allotment failure

All these should trigger:

- Email
 - SMS
 - App notification
-

7. Security & Compliance

Mandatory platform controls:

- Transaction audit logs
- Investor consent capture
- Risk disclosure acceptance
- Order timestamp logging
- Data Encryption

8. Reporting Requirements

The platform should generate:

- Statement of Account
- Capital gain report
- SIP calendar
- Portfolio valuation
